Z/630 PROJECT WORKSTATION, AN INTEGRATION OF BEAUTY AND FUNCTIONALITY BY QUIK LOK'S ITALIAN DESIGNER TEAM

- For the harmonious integration of your human activity within the high-tech world let Quik-Lok help you improve your flow of creative energy
- The Z/630 project workstation with its own 8-space rack, and the Z/612 companion 12-space rack, are the essence of design and functionality
- From the finest wood laminate tops and shelves to the underlying computer-welded 14-gauge steel with powder-coating black finish, these structures add a modern, elegant look to any work environment
- Available with wood laminate tops in both black and cherry finish

Z/630 CY

- Compact workstation table for home-recording and gaming
- Developed by Quik Lok to ensure maximum versatility and compactness in your work environment.
- The choice of a home recording desk has a huge impact on the atmosphere and workflow in your studio space. During composition, recording, mixing, mastering or editing in post, the right workstation for your room will allow you to always have at hand the most indispensable and most used equipment, completing the professional aspect of your creative space.
- Based on the classic Z-shaped design that has distinguished most of Quik Lok keyboard structures over the years, the WKS/001 desk is built with heavy gauge steel and equipped with a large worktop made of Eco-Friendly, moisture-resistant particle board, featuring a curved-edge contour for increased comfort.
- The coating of the worktop has a black finish with carbon effect that lends a modern and high-tech look while ensuring a high degree of protection from scratches and abrasions. Cable management closeable slots on both sides of the shelf help hide cables and grant the work surface a neat and functional look. A comfortable headphone holder and a drink holder are integrated into the desk to further complete it!
- The WKS/001 workstation will accommodate the most common MIDI controllers and master keyboards available on the market and is designed to be compatible with many useful Quik Lok accessories, such as the A/25 and A/26 broadcast boom arms, the LPH/009 multifunction stand, the MSC/001 and MST/001 monitor stands and the VSC/001 desk mount monitor arm.
